

Technologist (Junior)

About PRI

Our offices in Lindsay and Mississauga, Ontario, Canada support private and public geotechnical projects across Canada and around the world with on-site geotechnical engineering expertise and comprehensive laboratory testing. With over 100 years of combined experience, our team members provide hands-on help and recommendations to design and test construction projects like roadways and public works, small residential to high-rise buildings, solar installations, and large-scale infrastructure projects. Our diverse team includes engineers, EITs, Field and laboratory technicians of all levels, and we continue to grow rapidly.

Location: Ontario

Role and Responsibilities

- Supervise and/or carry out site inspections of construction work and materials testing
- Supervise subsurface investigations and correspond results to Project Manager (including overburden drilling and rock coring and test pit investigation) ensuring proper soil sampling protocols are followed for purpose of subsequent laboratory testing
- Assist with data entry, analysis and preparing documents
- Perform a full range of laboratory tests in soils/concrete lab
- Collection of environmental samples (soil and water) for chemical assessment in support of construction activities.
- Collaborate on all aspects of the excess soil assessment process including document review, sampling location determination, submission of samples, review of results and writing of associated reports (Assessment of Past Use, Sampling and Analysis Plan, Excess Soil Characterization Report Excess Soil Destination Report and Excess Soil Haulage Reporting).
- Assist with other environmental scopes of work as required
- Other duties as assigned

Qualifications and Education Requirements

- 2+ years field experience, preferably in consulting environment.
- Excellent communication skills, both verbal and written.
- Maintain a positive attitude in a dynamic team environment
- Flexible, well organized, interested in technical and personal advancement, able to carry out assignments with minimal supervision
- Proficiency in Microsoft Office
- CCIL and CSA Certifications an asset
- Ability to multitask and work efficiently under pressure.
- Ability to work in a fast-paced environment and to proactively respond to time-sensitive issues
- Must have own vehicle with appropriate insurance coverage and hold a Valid (G-Level) Ontario Driver's License

- Must be mobile and willing to work on a combination of field and office work, as travel will be required
- Following Health and Safety responsibilities, under all applicable government legislations and PRI Engineering policies and procedures
- Candidates to have completed a two or three-year program in civil engineering technology, geotechnical or geological diploma and eligible to receive professional designation such as C.E.T./C.Tech.
