

## Technologist (Intermediate)

### About PRI

Our offices in Lindsay and Mississauga, Ontario, Canada support private and public geotechnical projects across Canada and around the world with on-site geotechnical engineering expertise and comprehensive laboratory testing. With over 100 years of combined experience, our team members provide hands-on help and recommendations to design and test construction projects like roadways and public works, small residential to high-rise buildings, solar installations, and large-scale infrastructure projects. Our diverse team includes engineers, EITs, Field and laboratory technicians of all levels, and we continue to grow rapidly.

**Location:** Ontario

### Role and Responsibilities

- Assist in preparation of proposals, quote requests
- Coordinating and overseeing geotechnical investigations and assist in preparing geotechnical reports
- Prepare design drawings and figures using AutoCAD/Civil 3D
- Complete topographic surveys for engineering design purposes
- Supervise subsurface investigations and correspond results to Project Manager (including overburden drilling and rock coring and test pit investigation) ensuring proper soil sampling protocols are followed for purpose of subsequent laboratory testing
- Supervision of a variety of pile installations
- Undertake load testing programs for detail pile design, ensuring equipment and test apparatus meet all appropriate design requirements
- Supervise and/or carry out site inspections of construction work and materials testing
- Assist with data entry, analysis and preparing documents
- Perform a full range of laboratory tests in soils/concrete lab
- Other duties as assigned

### Qualifications and Education Requirements

- 5+ years field experience, preferably in consulting environment.
- Excellent communication skills, both verbal and written.
- Maintain a positive attitude in a dynamic team environment
- Flexible, well organized, interested in technical and personal advancement, able to carry out assignments with minimal supervision
- Proficiency in Microsoft Office, good working knowledge of AutoCAD systems and current geotechnical software applications such as Slope\W, Slide and gINT Software
- CCIL and CSA Certifications an asset
- Ability to multitask and work efficiently under pressure.
- Ability to work in a fast-paced environment and to proactively respond to time-sensitive issues

- Must have own vehicle with appropriate insurance coverage and hold a Valid (G-Level) Ontario Driver's License
- Must be mobile and willing to work on a combination of field and office work, as travel will be required
- Ability and willingness to work away from home up to 2 weeks duration, traveling interprovincially and internationally (New York, Caribbean)), overtime and / or weekends as required.
- Following Health and Safety responsibilities, under all applicable government legislations and PRI Engineering policies and procedures
- Candidates to have completed a three-year program in civil engineering technology, geotechnical or geological diploma and eligible to receive professional designation such as CET.
- Certified Engineering Technologist (CET) designation and current membership with the Ontario Association of Certified Engineering Technicians and Technologists (O.A.C.E.T.T.)
